

Aerial Rope

Technical requirements

TECHNICAL RIDER / EN

29.09.2026

Rigging point	Minimum 500 kg permissible load capacity for the agreed setup.
Height	Minimum 5 m.
Clear space	Clear floor area and aerial space: at least 3 m diameter.
Access	Rigging point readily accessible, e.g. by ladder, lift or access from above.
Duration	5 minutes.

Alternative without a rigging point

A freestanding rig may be possible after a venue review. This rig configuration requires 5 m height and at least 5 m diameter of clear floor area and aerial space. The exact setup and footprint must be confirmed in advance.

Music

“Natural” by Imagine Dragons. Alternative music is possible by prior agreement.

Load capacity means permissible loading, not breaking load. The entire load path, including dynamic loads, must be assessed and approved for performer flying by the responsible qualified person. These minimum requirements do not replace technical approval of the actual setup.
